Likith Venkat Pavan Kumar Sirigiri

DEVOPS ENGINEER

sirigirilikith1796@gmail.com +91-9912791165 Bangalore, India

SUMMARY

Results-oriented DevOps Engineer with 3+ years of experience in designing, implementing, and managing CI/CD pipelines. Skilled in automating build, release, and deployment processes across multiple environments using tools like Jenkins, Docker, and Kubernetes. Proven ability to collaborate with cross-functional teams to optimize software development workflows and enhance overall application performance. Strong troubleshooting and problem-solving abilities with a passion for continuous improvement and delivering high-quality software.

SKILLS

- Continuous Integration
- Infrastructure as Code
- Cloud Computing
- Automation Tools
- Containerization
- Agile Methodologies
- Scripting Languages
- Configuration Management
- Monitoring and Logging
- Collaboration and Communication

EXPERIENCE

DevOps Engineer

C R Infotech *Aug 2023 - Present*

- Collaborate with development and operations teams to automate, streamline, and improve deployment processes
- Design and implement continuous integration and continuous deployment pipelines
- Manage and monitor infrastructure and applications using tools such as Terraform, Docker, and Ansible
- Troubleshoot issues and provide technical support for development and operations teams
- Manage and improve configuration management systems
- Implement and maintain security, compliance, and disaster recovery measures
- Work closely with developers to optimize application performance and ensure scalability
- Collaborate with QA teams to ensure effective testing and delivery of software releases
- Research and recommend new technologies and methodologies to enhance DevOps practices
- Document processes, procedures, and system configurations.
- Participate in code reviews and provide feedback on infrastructurerelated best practices

DevOps Engineer

Avance Consulting Services Pvt Ltd *Jun 2022 - Aug 2023*

- Managing and maintaining CI/CD pipelines
- Implementing infrastructure as code using tools like Terraform or CloudFormation
- Working closely with software development teams to automate and streamline the build and release process
- Monitoring and troubleshooting production environments
- Implementing and managing monitoring and logging tools

- Ensuring system availability, reliability, and scalability
- Implementing security best practices in all aspects of the development and deployment process
- Colloborating with crossfunctional teams to improve overall system performance
- Participating in oncall rotation to address incident and outages

DevOps Engineer

Unilax Consumer Solutions Pvt Ltd *Jan 2022 - Jul 2022*

- Experience with continuous integration and deployment tools such as Jenkins.
- Strong experience with containerization tools such as Docker
- Proficiency in managing infrastructure as code using tools like Terraform, Ansible
- Implementing and maintaining CI/CD pipelines
- Collaborating with software developers to deploy and operate systems.
- Automating processes to improve deployment speed and reliability
- Troubleshooting and resolving issues in production environments
- Providing support and guidance to development teams on DevOps best practices

Jr. DevOps Engineer

C360 Software *Jul 2021 - Jan 2022*

- Monitor and maintain infrastructure and systems to ensure optimal performance and availability
- Collaborate with developement and operations teams to troubleshoot and resolve technical issues
- Assist senior DevOps engineer in designing and implementing automation tools and processes to streamline software development and release pipelines
- Participate in the planning and execution of software deployments and updates
- Take ownershop of assigned tasks and projects to drive them to completion within specified timelines

EDUCATION

Bachelor of Technology – Electrical & Electronics Engineering [E.E.E]

Jun 2016 - Apr 2019
