Likith Venkat Pavan Kumar Sirigiri

DEVOPS ENGINEER | AWS · Kubernetes · Terraform · CI/CD · Team Lead

sirigirilikith1796@gmail.com | +91-9912791165 | Bangalore, India | Open to Relocation: Japan / Global | Visa Sponsorship Required

PROFESSIONAL SUMMARY

DevOps Engineer and Team Lead with 4+ years of hands-on experience architecting cloud-native infrastructure, leading cross-functional teams, and delivering measurable cost and reliability improvements for fintech and SaaS platforms. Led a 20-member DevOps and L1 team, designed full observability stacks from scratch, built internal tooling entirely on open-source technologies, and reduced cloud infrastructure costs by over 40%. Experienced in client communications, DR compliance drills, and end-to-end product delivery. Comfortable working in English-speaking, globally distributed engineering teams.

TECHNICAL SKILLS

Cloud (AWS): EC2, EKS, S3, RDS, CloudWatch, IAM, VPC, Route53, CloudFront, Lambda

Cloud (Azure): Virtual Machines, Resource Groups, Cost Management, Subscription Management

Infrastructure as Code: Terraform, Ansible, CloudFormation

Containers & Orchestration: Docker, Kubernetes, Helm, ArgoCD, EKS

CI/CD: Jenkins, GitHub Actions, Agent-based Zero-Downtime Deployment Pipelines

Monitoring & Observability: Prometheus, Grafana, ELK Stack, MongoDB Exporter, RabbitMQ Exporter, Keycloak Exporter

Databases & Messaging: MongoDB, RabbitMQ, PostgreSQL

Scripting & OS: Bash, Python, Linux (Ubuntu / CentOS)

PROFESSIONAL EXPERIENCE

DevOps & L1 Team Lead | ezee.ai — *Dec 2024 – Present*

Fintech SaaS Platform (acquiring entity: Veefin Solutions) · Bangalore, India

- Led and mentored a 20-member cross-functional DevOps and L1 team, overseeing daily operations, incident resolution, and release delivery across multiple enterprise client environments
- Designed and implemented a full observability stack using Prometheus and Grafana with custom exporters (MongoDB, RabbitMQ, Keycloak), enabling proactive detection of infrastructure and API issues and directly improving client SLA adherence
- Built Mongo Explorer from scratch: a custom internal tool replacing NoSQL Booster, featuring MFA login, maker-checker approval workflow (Project Manager approval for every production change), 20-minute inactivity auto-logout, and expiry-based user accounts — eliminating audit gaps and unauthorised production access
- Developed a custom agent-based Deployment Dashboard enabling zero-downtime UI and API deployments, reducing average deployment time from 20–30 minutes to under 3 minutes
- Designed an Azure Cost Intelligence dashboard: analysed live resource utilisation per subscription and resource group over 15-day windows, flagged rightsizing opportunities, and automated non-prod environment shutdown/startup post business hours — achieving 40%+ total cloud cost reduction
- Represented DevOps in client-facing communications, participated in business negotiations, client onboarding, and product delivery sign-off; conducted DR (Disaster Recovery) drills in line with regulatory compliance requirements
- All internal tooling built entirely on open-source technologies — zero additional licensing cost to the business

DevOps Engineer | C R Infotech — *Aug 2023 – Nov 2024*

IT Services Company · Bangalore, India

- Designed and maintained CI/CD pipelines using Jenkins and GitHub Actions across dev, staging, and production environments, reducing release cycle time and deployment errors
- Managed AWS infrastructure (EC2, EKS, S3, RDS, VPC, IAM) using Terraform and Ansible, ensuring consistent and repeatable provisioning across environments

- Containerised application workloads using Docker and Kubernetes (EKS), supporting horizontal scaling and improving deployment consistency for production services
- Implemented security compliance controls, disaster recovery measures, and automated alerting using Prometheus and Grafana
- Collaborated with QA and development teams to integrate automated testing into CI pipelines, improving release quality and reducing post-deployment incidents
- Documented infrastructure configurations, runbooks, and incident response procedures to support team knowledge sharing and operational continuity

DevOps Engineer (Consultant) | **Avance Consulting Services Pvt Ltd** *Jul 2022 – Aug 2023*

Consulting engagement · Deployed to client: Wisestep (Recruitment Technology SaaS Platform)

- Managed and optimised CI/CD pipelines on Jenkins, standardising pipeline structure and improving deployment reliability across development and production environments
- Implemented infrastructure as code using Terraform and CloudFormation for AWS provisioning, reducing manual setup time and eliminating configuration drift
- Monitored and troubleshot production environments; participated in on-call rotation to resolve incidents and maintain high system availability
- Implemented security best practices including IAM policies, secrets management, and environment segregation across the full deployment pipeline
- Collaborated with cross-functional teams to improve system performance, deployment reliability, and overall release velocity

DevOps Engineer | **Unilax Consumer Solutions Pvt Ltd** *Jan 2022 – Jun 2022*

Consumer Technology Startup · Bangalore, India

- Built and maintained CI/CD pipelines using Jenkins; containerised applications with Docker, reducing environment inconsistency issues across development and production
- Automated infrastructure provisioning using Terraform and Ansible, improving deployment speed and repeatability
- Troubleshot and resolved production incidents; supported development teams on DevOps best practices and deployment workflows

Jr. DevOps Engineer | **C360 Software** *Jul 2021 – Jan 2022*

Software Products Company · First Professional Role

- Monitored and maintained infrastructure to ensure optimal system performance and availability
- Assisted senior DevOps engineers in implementing automation tools and deployment pipeline improvements
- Collaborated with development and operations teams to troubleshoot and resolve technical issues; participated in software deployment planning and execution

EDUCATION

Bachelor of Technology (B.Tech) – Electrical & Electronics Engineering

Narayana Engineering College, Nellore | Jawaharlal Nehru Technological University (JNTU), Anantapuram | 2016 – 2019

Diploma – Electrical & Electronics Engineering

Government Polytechnic College, Nellore | 2012 – 2016 (Lateral entry pathway to B.Tech)

Career note: *Apr 2019 – Jul 2021 — Career transition period impacted by COVID-19 pandemic. Used this time for self-directed study in Linux, cloud fundamentals, and networking, leading to transition into DevOps.*

CERTIFICATIONS & LEARNING

- AWS Certified Solutions Architect – Associate (In Progress · Target: Q3 2026)
- Certified Kubernetes Administrator (CKA) – Planned Q4 2026

LANGUAGES

English – Professional | **Telugu** – Native | **Hindi** – Conversational | **Japanese** – Beginner (actively learning)
